Wipe on Urethane Stains & Topcoats

General Finishes Gel Stains and Topcoat have been formulated to produce a beautiful hand-rubbed finish. These easy to use products simply wipe on with a rag. There's no messy splashing, drips or runs. Gel stains produce an even finish on hard to stain woods such as Aspen, Pine or Maple.

- **Pleasant odor.**
- **Water, alcohol and heat resistant.**
- **Will never chip, crack or peel.**
- **Non-toxic after drying.**
- **Stains are compatible with other topcoats.**

Application of Gel Stains:

Using a cloth, foam brush or paint pad applicator, apply a liberal amount of GEL STAIN to the area you are working. Divide your project into sections, drawer front, table or cabinet top, side of chest, etc. Then using a clean cloth wipe off the excess stain in the direction of the grain. Be sure to remove all rag marks and smudges. Additional coats of stain may be applied for a deeper, richer color.

Optional:
Due to the high content of urethane in Gel Stains, they may be used by themselves as a one can finish. We recommend applying 2-3 coats. However, for maximum durability apply Gel Topcoat over Gel Stain.

Application of Gel Topcoats:

Using a cloth, foam brush or paint pad applicator, apply a liberal amount of GEL TOPCOAT. Wipe off the excess evenly with the grain. Make sure to wipe off any smudges or rag marks. We recommend 2-3 coats.

Dry Time: Good Conditions 6-8 hours.
Cold or Damp Conditions 24 hours.

Clean Up: Mineral Spirits or Waterless Hand Cleaner

Coverage: 200 ft^2/quart or 4.92 m^2/liter
